

Odyssey Production Prototype Program

Pantheon's Odyssey is a Digital Process Automation Platform that **helps better integrate your organization's existing solutions, products and tools infrastructure to achieve savings in time and resources.** It eases the complexities of form design, approvals, workflows, built-in security, and **integration** with its **no-code** solution. Odyssey is an application development, integration and business process automation tool that simplifies the way you do work. With 4,000+ integration points out of the box, Odyssey can interface, on average, with 70% of a company's technology stack.

Odyssey, dedicated to **Relentless Simplicity**, is a true *no code* platform that enables you to get to value quicker and more efficiently than any other tool in the market. We are so convinced of this, that we have created the Odyssey Production Prototype Program. Odyssey will be set up free for you to use over a 90-day period. At the end of the 90-day period, you decide whether to continue with Odyssey at the previously agreed pricing or have it removed at no cost to you.

How It Works

Weeks 1 – 6

Solution Set-up & Deploy: Pantheon will install the point solution defined by the use case you have identified, delivering the Odyssey solution in a SaaS format.

- Define solution scope.
- Customer environment approvals.
- Agree commercials.
- Develop, Build & Test solution.
- UAT Testing of Solution by Customer.
- Feedback loop for adjustments
- Customer Approval for installation.
- Train customer users to use the solution.
- Deploy solution.

Weeks 7 – 12

Customer Usage: Customer uses the Odyssey solution in its environment and compares the new process to the previous process.

- Customer Users follow the new process employing the Odyssey solution.
- Pantheon provides support based on Agreed Commercials.
- Program review for process improvement and tweaking solution.
- Check points on progress at end of weeks 7, 9, and 11 (minimum).
- Week 12 Customer decision on keeping or returning the Odyssey Solution.

Prior to kick off, the Pantheon team will work with you to identify any prep work that must be completed prior to program initiation to ensure a successful Production Prototype Program.
