

The Power of Odyssey

Odyssey is a comprehensive **Digital Automation Platform** that ties together your organization's existing IT infrastructure, as well as new applications you may want to introduce, to achieve savings in time and resources.

DIVERSE POWERS FOR DIVERSE SOLUTIONS

Odyssey automates such diverse activities as: change management; knowledge management; automated disaster recovery; security, control and auditing; compliance, governance and reporting; build and deployment management. Whether deploying configuration changes to a thousand servers or simplifying the paperwork, Odyssey helps you get to your solution more quickly and economically than custom application development.

Customers in such diverse areas as finance and banking, energy and utilities, pharmaceutical and healthcare, manufacturing, telecommunications, both in the private and public sectors have benefited from Odyssey's power.

- **Powerful Integration**
- **No-Code Process Solutions**
- **Powerful Workflow Editors**
- **Intuitive Form Design**
- **Robust Security**
- **Easy Dashboard Interface**
- **Mobile Ready**
- **Cloud Ready**

ODYSSEY INTEGRATION & NO-CODE SOLUTIONS

Unleash the Power of Plug-Ins for the Worlds of Information Technology and Business Solutions.

Odyssey's Task Agent technology plug-ins internalize the complexity of interfacing with external systems when automating workflows or creating new integration points. The Task Agents present the configuration options and variables as drop-down menus, checkboxes, and simple fields. The project editors avoid all of the work of deciphering the calls to third-party REST APIs, the syntax of executable command-line options, or the complexity of process calls.

With over 350 Task Agents supporting over 4000 function integrations for the OS, database, and application layers, your organization does not have to overhaul your entire IT environment to see the benefits of digital automation. If Odyssey does not yet support your application, it generally takes two weeks to build a new integration point with Odyssey's Automated Task Agent Generator.

All of Odyssey's power comes together into faster implementations and better re-use of the systems you already have and trust, in a package that reduces the number of domain-experts needed to deliver excellence. That is the way no-code solutions should work.

SUCCESS STORIES

One of the largest Oil & Gas Companies has 108,000 people leveraging 124,000 applications in 36 countries. They use Odyssey to integrate Cyber Security, Identity Management, DevOps, Change Management (IT, business and supply change management), and vital ERP systems.

A large bank started using Odyssey to support DevOps, but has since expanded its use across the enterprise. Now they use it to provision environments (cloud, mainframe, etc.), manage their ATM network, and integrate data from various and disparate platforms to source data lakes.
